Forecast For East of England
Issued by Met Office Exeter
at 0400 on Sunday 10 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Widespread sharp frost, ice and freezing fog clearing slowly.

Today:
Areas of freezing fog will gradually clear from most places, perhaps lingering across southern parts, as cloud increases through the day. Staying mainly dry and cold. Breezy in the north later. Maximum temperature 4 deg C (39 deg F).

Tonight:
Cloudy but dry with the odd clear spell, breezy in the north but light winds further south. Less cold than previous nights with the odd fog patch. Minimum temperature 1 deg C (34 deg F).

Monday:
After a dry start with the odd fog patch and also some brighter spells cloud will increase with rain by evening. Turning quite windy. Maximum temperature 8 deg C (46 deg F).

Outlook for Tuesday to Thursday:
Tuesday, cold and dry after early rain clears south. Sunny spells developing with winds easing. Wednesday, rain turning heavy at times, windy later. Thursday, windy with coastal showers, drier later.
